

Environmental Policy

T&B (Contractors) are a regional business; our core activity is managing the design and construction process of projects across all market sectors. We recognise that as a result our operations can have significant implications with regard to the environment.

We are committed to conducting our business in a way that contributes to environmental improvement and sustainable development and will discharge our responsibilities by the implementation, management and audit of the following:

- Identification and strict compliance with good practice, relevant standards and legislation.
- The establishment and support of management, structure and procedures which ensure that environmental life cycle impact of any and all our activities is evaluated and managed as required by ISO14001:2015
- The measurement of our key environmental impacts within the context of continuous improvement and a responsible learning culture.
- Regular review of this policy, our performance and objectives to ensure that we are doing all we can to achieve best practice setting standards and goals of the highest caliber.

Environmental Objectives

As a responsible contractor and employer, we wish to use our influence in order to protect the environment in which we live and work and will strive to:

- Identify areas of environmental risk, prepare measures to mitigate against those risks and respond effectively to any emergency.
- Consider the environmental aspects and impacts associated with the life cycle stages of our products and services and take steps to promote positive environmental outcomes where we have influence.
- Organise our operations to minimise any negative impact and the effects of noise, dust, disturbance and inconvenience.
- Use our expertise and experience to effect environmentally friendly solutions in both the design and construction processes that we are involved with.
- Search for, propose and adopt low polluting sustainable, materials, technologies and working practices.
- Promote responsible sourcing and purchase of materials and services that through their use, sourcing and manufacture have the least harmful effect on the environment.
- Reduce the amount of waste generated by our activities, sites and premises whilst increasing the proportion of our waste that is recycled.
- Consider the efficient use of energy, fuel, processes and materials to reduce carbon emissions resulting from our activities.
- Conserve and reduce demand for water as a result of our activities.
- Contribute to the enhancement, conservation and protection of the natural environment.
- Expect our partners, suppliers and contractors to share our concern for the environment and to work with us in identifying and applying best practice.
- Support and encourage staff and suppliers to improve environmental performance by providing training in this regard.

Our Commitment

The senior management are committed to this policy and continual improvement in environmental performance and protection.

A handwritten signature in blue ink, appearing to read 'M.A.A.', followed by a period.
